

## StepTribe

This is a small Ableton Live / Max for Live *step sequencer* made for exclusive use with the Korg Monotribe (once MIDI modified) in combination with the MTribe control surface. It's user interface and engine is the same of the J74 StepSequencer64 (<http://fabriziopoce.com/GrooveBox64.html>).

Just drop this device before the MTribe (same track, just left of it) and there you go. If you like you can also use this device without MTribe, modulating directly the Monotribe (modulation features will be slightly limited in this case).

Controls:

The screenshot shows the StepTribe interface with the following annotations:

- Summary display**: Labels for 'All', 'Note', 'Velocity', 'Duration', 'Envelope1', and 'Envelope2' displays.
- Select Scale for Note Modifiers**: Points to 'major' and 'never' buttons under 'mod / prob.'.
- Select Probability for Note Modifiers**: Points to 'forward' and 'backward' buttons under 'direction'.
- Select Sequencer direction**: Points to left and right arrow buttons.
- Shift value left/up/down/right**: Points to 'shift\_left' and 'shift\_right' buttons.
- Copy / Paste / Reset sequence**: Points to 'copy', 'paste', and 'reset' buttons in the 'presets' section.
- Type destinations**: Points to 'Driving MTribe', 'Env1 destination', 'LFO\_intensity', 'Env2 destination', and 'MTribe\_trac...' dropdowns.
- Select the destination for modulation envelope Env2**: Points to the 'Env2' dropdown.
- Select the destination for modulation envelope Env1**: Points to the 'Env1' dropdown.
- Selects the mode of operation**: Lists '- Drive the MTribe (default)' and '- No MTribe, direct to Monotribe'.
- Step Active (orange)** and **Mute (gray)**: Points to the 'steps' bar.
- Scale / Note Modifier ON (yellow)** and **Off (gray)**: Points to the 'modf%' bar.
- Shift steps left / right**: Points to 'pitch\_up', 'pitch\_down', 'vel\_up', and 'vel\_down' buttons.
- All steps Note Velocity up / down**: Points to 'pitch\_up', 'pitch\_down', 'vel\_up', and 'vel\_down' buttons.
- Shift steps left / right**: Points to 'shift\_left' and 'shift\_right' buttons.
- All steps Envelope2 up / down**: Points to 'env1\_up', 'env1\_down', 'env2\_up', and 'env2\_down' buttons.
- All steps Envelope1 up / down**: Points to 'env1\_up', 'env1\_down', 'env2\_up', and 'env2\_down' buttons.
- All steps Note Pitch up / down**: Points to 'pitch\_up' and 'pitch\_down' buttons.
- All steps Note Duration up / down**: Points to 'dur\_up' and 'dur\_down' buttons.
- Preset Save (yellow)**: Points to the 'read' button.
- Preset Recall (gray)**: Points to the 'write' button.
- Preset Import (read)**, **Preset Export (write)**, and **Clear Preset memory**: Points to the 'read', 'write', and 'clear' buttons.
